Subject: Risk Assessment Review

Dave,

The U.S. Environmental Protection Agency (EPA) Region III had previously review the Remedial Investigation / Feasibility Study (RI/FS) (dated March 2001) and commented on the document on November 10, 2001. One additional factual comment that EPA did not make at that time was the disappointment that toxicologist, Jennifer Hubbard from EPA Technical Support Section (3HS41) had with the Risk Assessment portion of the RI/FS report. There were over 70 comments provided in her review; however, Ms. Hubbard's disappointment was not the additional effort to review the document. The disappointment was that she had previously counseled and provided direct guidance to your engineering firm on EPA's proper risk assessment development and specific factors that should be incorporated into this type of a report. This guidance was not followed which resulted in her re-working the entire document.
